Forward

Following the great International Attachment Conference in Regensburg (2003), in Paris (2005), in Braga (2007), in Barcelona (2009) and in Oslo (2011), we are pleased to welcome you to the 2013 International Attachment Conference in Pavia, Italy.

The conference aims at presenting an overview of current and emerging trends in research concerning attachment in community, cross-cultural, developmental and clinical contexts.

The Conference program - 12 **keynote lectures**, about 30 **symposia** and 80 **poster presentations** - will reflect current trends in attachment research including convergent evidence from studies of emotion, brain, body, mind and behaviour as related to reliable and valid measures of attachment, with a particular focus on bridging clinical and developmental sciences.

Keynote lectures will be the only plenary activity, with nothing else scheduled simultaneously

Each day, in the afternoon, **parallel symposia** and **poster presentation sessions** will be scheduled

A new event at the IAC Biennial Meetings is the "**Lunch with the Leaders**" that provides a forum for students to interact with senior scholars who have central roles in the field of attachment.

In addition to the Conference program, **three Pre-Conference Trainings** are taking place. I'm happy to announce that several social events will add a special welcome and pleasant time to all of you in attending the Conference.

We warmly welcome you all to the 6th biennial International Attachment Conference in Pavia!

On behalf of the Local Organizing Committee

Lavinia Barone, Chairperson of the Conference

A handwritten signature in cursive script, reading "Lavinia Barone".

6th International Attachment Conference
Pre-Conference Trainings

The Reaction To Diagnosis Interview (RDI) Training
An Evidence-Based Clinical Assessment Course
Pre-Conference Workshop, August 27th -29th

Presented by
Bob Marvin, Ph.D.

Reflective Functioning (RF) Training Seminar
Pre-Conference Workshop, August 27th -29th

Presented by
Howard Steele, Ph.D.

Video-feedback Intervention to Promote Positive Parenting & Sensitive Discipline (VIPP-SD)
Pre-Conference Workshop, August 26th -29th

Presented by
Estelle Wensveen-Struis

KEY-NOTE PERSONS

MASSIMO AMMANITI

Massimo Ammaniti, child psychiatrist and psychoanalyst, full professor of Developmental Psychopathology and chairman of the Faculty of Infant and Adolescent Clinical Psychology at University La Sapienza, in Rome, Italy. Full member of the International Psychoanalytical Association and member of the Research Advisory Board of International Psychoanalytical Ass.

Additionally, he serves as a member of the Board of Directors of the World Association of Infant Mental Health. His main work focused on the analysis of parent-child interaction from infancy to adolescence, investigating both

socio-emotional and neurobiological correlates of human development.

LAVINIA BARONE

Lavinia Barone is Psychologist/psychotherapist and Professor of Developmental Psychology at the University of Pavia - Department of Brain and Behavioral Sciences.

Member of the executive board of the Italian Association of Psychology (developmental Section); founding member and vice-president of the Society for Emotion and Attachment Study – SEAS - and of the Italian Association of Dialectical Behaviour Therapy for Borderline Personality Disorder. Lavinia Barone is director of the Laboratory for Attachment Studies and Interventions in Parenting at the University of Pavia.

Her main research and clinical interests are in the field of socio-emotional development, parenting and personality disorders, with a special attention to the developmental pathways of psychopathology and disorganised attachment in the life span.

MARIAN J. BAKERMANS-KRANENBURG

Professor of Child and Family Studies at Leiden University. As part of her PhD study 90 first-time mothers were interviewed with the Adult Attachment Interview. The group of mothers was followed up in order to observe attachment behaviours of the second-born children. M. Bakermans-Kranenburg and colleagues also started the application of DNA genotyping in the context of a twin study and several other studies. Part of her job is the coordination and organization of the behavioural and molecular genetics project within the Leiden Attachment Research Program. The growing interest in the interplay between nature and nurture has led to several studies on gene-environment interaction,

with a special focus on the 'differential susceptibility' of children to rearing influences. The Leiden research group studies (see VIPP-SD intervention) and meta-analytic work shows that the supposed *vulnerability* of children with a difficult temperament or carriers of the DRD4-7R allele is only part of the story: temperament and dopamine related genes may also be considered as potential markers of differential susceptibility or biological plasticity in response to environmental influences.

Regarding the neurobiology of parenting, together with the Leiden research group M. Bakermans-Kranenburg examined the underlying mechanisms of adults' intended caregiving responses to systematically varied cry sounds, using an experimental design in an adult twin study. The experimentally manipulated oxytocin levels was found to decrease amygdala activity in response to infant cry sounds, and to increase activation in the insula and inferior frontal gyrus pars triangularis, thus reducing activation in the neural circuitry for anxiety and aversion, and increasing activation in regions involved in empathy.

NINO DAZZI

Nino Dazzi, full Professor of Dynamic and Clinical Psychology. Founding member of SPR-Italy (Italian section of the International Society for Psychotherapy Research) and member of the executive board of the Italian Association of Psychology. Official trainer of the Adult Attachment Interview institute in Italy, Rome, his main work focused on history of psychology and research method in psychotherapy.

PASCO FEARON

Professor at the Research Department of Clinical, Educational and Health Psychology, UCL, London. His research focuses on the mechanisms of socio-emotional development and the processes involved in risk for psychopathology.

He is particularly interested in the intersection between social and biological processes in children's development, and accordingly he use a range of diverse methods, including observational techniques for measuring family processes (attachment, parenting), quantitative and molecular genetics for examining genes and gene-

environment interactions, and biological measurements for capturing peripheral physiology (e.g. cortisol, heart rate) and brain function (EEG, fMRI).

As his primary interest is in development, much of his work involves longitudinal cohort studies, and multivariate longitudinal data analysis.

RUTH FELDMAN

Professor in the Department of Psychology and in the Brain Research Center at Bar-Ilan University; adjunct professor at the Child Study Center at Yale University (USA). Her main areas of research interest are development of interfamilial relations and parent-child relations in normal and pathological populations; regulation processes throughout childhood; neurological basis of communication; maternal depression and depression among children; childhood stress and trauma; and, development of premature babies. Prof. Feldman received her Ph.D. in psychology from the Hebrew University of Jerusalem in 1994.

KARIN & KLAUS GROSSMANN

Klaus E. Grossmann, Prof. emeritus of the Department of Psychology, University of Regensburg since 2003. Born 1935 in Leipzig. Fulbright scholar (Ph. D., University of Arkansas 1965). Habilitation in Psychology and behavioural biology in Freiburg, Germany, 1971. Many visits with Mary Ainsworth since 1973. Longitudinal research in attachment development cross culturally jointly with his wife Karin. Close communication with John Bowlby, who received an honorary doctoral degree from the University

of Regensburg in 1989.

Karin Grossmann, Dr. phil., Dipl. Psych. Independent scientist and senior researcher associated with the University of Regensburg. Born 1942 in Berlin. Bachelor of Arts in Mathematics and English at the University of Arkansas, USA. Psychology in Freiburg, Münster and Regensburg, Germany (Ph.D. 1984). Research and publications in longitudinal and cross-cultural studies of attachment together with Klaus E. Grossmann. Additional publications and teachings in German on applications of attachment theory to family matters.

Karin and Klaus have 2 children, 3 grandchildren, and 2 step-grandchildren.

Both received in 2006 the Bowlby/Ainsworth Award of The New York Attachment Consortium for “demonstrating the central roles of ethological observation, cross-cultural data, and longitudinal designs in attachment study” (Sept. 19th, 2006).

Both received in 2007 the Arnold-Lucius-Gesell Award by the Theodor-Hellbrügge Stiftung for “their outstanding longitudinal research on the development of parent-child-attachment”.

GIOVANNI LIOTTI

Psychiatrist and psychotherapist, currently teaches in the APC Post-graduate School of Psychotherapy, Roma, Italy. His interest for the clinical applications of attachment theory, first expressed in a book co-authored with V.F. Guidano, (*Cognitive processes and emotional disorders*”, Guilford Press, 1983) focused in the last twenty years on the links between trauma, dissociation and attachment disorganization. He received the Pierre Janet’s Writing Award (*The International Society for the Study of Trauma and*

Dissociation, 2005) and the International Mind and Brain Award (*University of Turin, Italy*, 2006). His last book, co-authored with Benedetto Farina, is *Sviluppi traumatici: Eziopatogenesi, clinica e terapia della dimensione dissociativa* [*Traumatic development: etiology, clinical features and therapy of the dissociative dimension*, Cortina Editore, 2011].

ROBERT MARVIN

Dr. Marvin was an undergraduate student and research associate with Mary D. Ainsworth at The Johns Hopkins University. He received his Ph.D. in developmental and clinical psychology from the University of Chicago in 1972.

After completing a postdoctoral fellowship at the Institute of Child Development, University of Minnesota he began teaching at the University of Virginia, where he is currently Professor Emeritus in the School of Medicine and Research Professor in the Department of

Psychology. He is also founder and Director of the Mary D. Ainsworth Child-Parent Attachment Clinic in Charlottesville, Virginia. Throughout his career, Dr. Marvin has been active in basic and clinical attachment research and intervention. He has focused on families with normally-developing children, families who have children with chronic medical or developmental conditions, and families who have children with histories of disrupted or maltreating early relationships. He was co-author (with Jude Cassidy, Ph.D.) of the MacArthur Preschool Attachment Classification System; and co-author (with Robert C. Pianta, Ph.D.) of the Reaction to Diagnosis Interview. He was also the Principle Investigator in developing and testing the *Circle of Security*® intervention protocol. Currently, he is especially active in using these procedures and protocols in developing community-based partnerships among professionals working with families whose children have the risk factors listed above. He travels extensively to train these professionals in implementing science-based practices that integrate developmental psychology, clinical psychology, and family systems work.

ABRAHAM (AVI) SAGI-SCHWARTZ

Abraham (Avi) Sagi-Schwartz is Professor of Psychology and Director of the Center for the Study of Child Development, University of Haifa, Israel. Sagi-Schwartz holds a BA degree in social work from the Hebrew University of Jerusalem, a master's in social work, a master's in psychology, and a Ph.D. in developmental psychology and social work from the University of Michigan, Ann Arbor. His main research interests are in the area of attachment and socioemotional development across the life span and across cultures. In recent years, he has studied socioemotional development and

adaptation under extreme life circumstances and experiences, especially the effects of the Holocaust as well as other violent political conflicts.

He is the recipient of the 2007 Society for Research in Child Development Award for Distinguished International Contributions to Child Development, and currently the 2013 Phyllis Greenberg Heideman and Richard D. Heideman Fellow, The Center for Advanced Holocaust Studies, United States Holocaust Memorial Museum, Washington, DC.

HOWARD STEELE

Howard Steele, PhD (1991, University College London, Psychology)

MA, 1986 Teachers College, Columbia University, Developmental and Educational Psychology ; MA, 1983, UBC, Religious Studies, BA, 1981, UBC, History)

Professor and Director of Graduate Studies in Psychology, at the New School for Social Research in New York City. At the New School. Dr. Steele co-directs (with Dr. M. Steele) the Center for Attachment Research, devoted to the study of parenting and child development in diverse contexts. H. & M. Steele are co-editors of the 2008 book, *Clinical applications of the Adult Attachment Interview*. H. Steele is

also senior and founding editor of the international journal, *Attachment and Human Development*, and publishes widely on parenting, attachment, loss, trauma, and emotion understanding across the lifespan and across generations.

In London between 1986 and 2004, Howard Steele with Miriam Steele initiated one of the world's major longitudinal studies of attachment known as the London Parent-Child Project. The study followed 100 families giving birth to a first child from pregnancy through successive follow assessments that culminated in interviews and observations with 17 year-olds. The London Parent-Child Project also gave rise to the concept of reflective functioning that has evolved into mentalization – based treatments for adults with BPD and is increasingly seen as a valuable mode of therapeutic intervention with children, adults and families in general with serious emotional troubles.

MIRIAM STEELE

Miriam Steele is professor and Director of Clinical Training at the New School for Social Research in New York City. Miriam Steele bridges the world of psychoanalytic thinking and clinical practice with contemporary research in child development. She trained as a child psychoanalyst at the Anna Freud Center London and received her Ph.D. at University College London.

Her research began with the study “Intergenerational Patterns of Attachment,” which embodied one of the first prospective longitudinal studies incorporating the Adult Attachment Interviews and Strange Situation protocols. This work was important in initiating the concept of “reflective

functioning” and providing empirical data to demonstrate the importance of parental states of mind in the social and emotional development of their children.

Dr. Steele is also interested in the field of adoption and foster care with a view to understanding the impact of attachment representations from both the adopters and the

children's point of view.

Currently, Dr. Steele's main area of current research include a study of the efficacy of an innovative attachment-based intervention with high-risk families, a collaborative venture with colleagues at the Rose Kennedy Center, Albert Einstein school of Medicine, a study of attachment relationships in Chinese and Bulgarian orphanages, and a collaborative study on the intergenerational transmission of body and attachment representations. Dr. Steele is now piloting a study focused on Assisted Reproductive Technology and parent-child attachment relationships in a group of families who conceived with the help of egg donors.

ISABEL SOARES

Isabel Soares is full professor at the School of Psychology, University of Minho, Portugal, teaching Developmental Psychopathology and Clinical Psychology.

Her current research is focused on attachment disordered behaviors in institutionally reared children, compared with other groups of children with autism and Williams Syndrome, using a GXE approach and considering the role of neural activity. Another topic of research is an attachment based intervention with a group of high risk mothers and their children using the VIPP-SD, in collaboration with Judi Mesman from Child and Family Studies, Leiden University.

KARINE VERSCHUEREN

Karine Verschueren is full professor at the research unit School psychology and Child and Adolescent Development (SCAD) of the Catholic University of Leuven, Belgium. In 1996 she received her PhD in developmental psychology, studying the relations between attachment representations, self-concept, and socio-emotional functioning in kindergartners. In 2000 she was appointed as professor in School Psychology. In the past years she conducted research on children's psychosocial and academic development in schools and on how proximal relationships with parents, teachers, and peers shape this development. Among other developmental models, attachment theory has been a guiding framework for her research. In 2012 she edited a

special issue in *Attachment and Human Development* on '*Teacher-child relationships from an attachment perspective*'. She is member of the editorial board of *Journal of School Psychology* and *Attachment and Human Development*.

MARINUS VAN IJZENDOORN

Prof. Marinus van IJzendoorn is Full professor at the Institute of Education and Child Studies, Leiden University (since 1981). He is Director of research at the Centre for Child and Family Studies (since 1978). Dean of the Faculty of Social and Behavioral Sciences at Leiden University (1998-1999). Scientific Director Institute of Education and Child Studies (2003-2010). Part-time Research Professor Human Development at the Erasmus University Rotterdam (since November 2010).

Is member of the Editorial Board of: *Developmental Psychology* (2012-); *Human Development* (1988-1997); *Child Development* (1992-); *Journal of Reproductive and Perinatal Psychology* (1995-2003); *Developmental Science* (1997-2002); *Social Development* (1997-2005); *Attachment and Human Development* (1998-); *British Journal of Developmental Psychology* (Associate Editor) (1998-2005); *Infant Behavior and Development* (1999-); *Parenting* (2002-); *Personal Relationships* (2003-2005); *Early Childhood Research Quarterly* (2005-2008); *Child Maltreatment* (2009-).

His main research interests are: Attachment across the life-span; epidemiology and neurobiology of child abuse and neglect; cross-cultural dimensions of parenting and child emotional development; meta-analysis; parenting; daycare; temperament; behavioral and molecular genetics of socio-emotional development; developmental epigenetics; differential susceptibility; moral development; biobehavioural family interventions; externalizing behavior problems; autism; child development in orphanages; adoption; oxytocin and parenting.

DAVID WALLIN

David Wallin, Ph.D. is a clinical psychologist in private practice in Albany and Mill Valley, CA. A magna cum laude graduate of Harvard College who received his doctorate from the Wright Institute in Berkeley, he has been practicing, teaching and writing about psychotherapy for nearly three decades.

His most recent book, *Attachment in Psychotherapy* (Guilford, 2007), is presently being translated into nine languages. He is also co-author (with Stephen Goldbart) of *Mapping the Terrain of the Heart: Passion, Tenderness, and the Capacity to Love* (Jason Aronson, 1996). He has lectured on attachment and psychotherapy in Australia, Europe, Canada, and throughout the United States.

DAY BY DAY PROGRAM AT A GLANCE

FRIDAY 30 AUGUST	
8:00 am - 1:00 pm Frascini Theatre, Corso Strada Nuova 136 2:30 - 6:30 pm University Campus, Corso Strada Nuova 65	
8:00-9:00 am	Welcome & service desk
9:00-9:30 am	Opening Conference
9:30-11:00 am	PANEL 1. ATTACHMENT AND NEUROBIOLOGY
	Chair/Discussant: M.H. van IJzendoorn
	Key-note speakers:
9:30-11:00 am	Massimo Ammaniti
	“Neurobiology and attachment: the role of the mirror neuron system”
	Marian Bakermans-Kranenburg
9:30-11:00 am	“Sniffing around Oxytocin. Trials with oxytocin administration in healthy and clinical groups”
11:00-11:30 am	Coffee break
11:00-11:30 am	Chair/Discussant: M.H. van IJzendoorn
	Key-note speakers:
	Pasco Fearon
11:30-1:00 pm	“The behavioral genetics of attachment in adolescence”
	Ruth Feldman
	“Bio-behavioral synchrony and the cross generation transmission of social adaptation and psychopathology”
1:00-2:30 pm	Lunch
2:30-4:00 pm	INVITED SYMPOSIUM
	“Attachment and adoption”. Simultaneous translation English-Italian
	PARALLEL SYMPOSIA
4:00-4:30 pm	Coffee break
4:00-5:00 pm	POSTER SESSION
5:00-6:30 pm	INVITED SYMPOSIUM: “Risk assessment and intervention in parenting”
	PARALLEL SYMPOSIA
6:45 pm	FREE SOCIAL EVENT: University main entrance, Strada Nuova 65: Meeting point for University Campus Tour/ Pavia Touristic Tour

SATURDAY 31 AUGUST

8:30 am-1:00 pm Frascini Theatre, Corso Strada Nuova 136

2:30-6:30 pm University Campus, Corso Strada Nuova 65

PANEL 2 TRAUMA; DEVELOPMENTAL AND CLINICAL ISSUES

Chair/Discussant: **Nino Dazzi**

Key-note speakers:

Lavinia Barone

9:30-11:00 am

"Understanding trauma in different "contexts" along the life cycle. The multifaceted picture of attachment disorganization"

Abraham Sagi-Schwartz

"What can attachment theory and research tell us about the multiple facets of trauma? From severe vulnerability to promising resilience"

11:00-11:30 am

Coffee break

Chair/Discussant: **Nino Dazzi**

Key-note speakers:

Giovanni Liotti

11:30-1:00 pm

"Relationships between attachment disorganization, trauma and dissociation: comments on recent findings"

David Wallin

"Wounds That Must Serve As Tools: The Therapist's Attachment History As a Source of Impasse and Inspiration"

1:00-2:30 pm

Lunch

INVITED SYMPOSIUM

"Attachment theory and clinical applications"

2:30-4:00 pm

Simultaneous translation English-Italian

Parallel symposia

4:00-4:30 pm

Coffee break -Pavia wines and food degustation

4:00-5:00 pm

POSTER SESSION

5:00-6:30 pm

PARALLEL SYMPOSIA

9:30 pm

FREE SOCIAL EVENT for all participants: Classical Concert by "I solisti di Pavia"

University Campus. Room: Aula del '400

SUNDAY 1 SEPTEMBER

8:30 am - 1:30 pm Fraschini Theatre, Corso Strada Nuova 136

8:30 am

SOCIETY FOR EMOTION AND ATTACHMENT STUDIES-SEAS
Members' FULL MEETING

9:30-11:00 am

PANEL 3: PARENTS TEACHERS AND CHILDREN: AN ATTACHMENT PERSPECTIVE

Chair/Discussant: **Karin & Klaus Grossmann**

Key-note speakers:

Robert Marvin

"Disruptive Behavior Problems, Attachment, and The Circle of Security"

Isabel Soares

"Growing up in poverty and deprived from (sensitive) parental care"

11:00-11:30 am

Coffee break

Chair/Discussant: **Karin & Klaus Grossmann**

Key-note speakers:

Miriam Steele

11:30-1:00 pm

"Breaking the cycle of intergenerational transmission of trauma: A report on an Attachment based Intervention"

Karine Verschueren

"From family to school: how do children's attachment experiences in the home shape their relationships and success at school".

1:00-1:30 pm

FINAL DISCUSSION: Howard Steele

FRIDAY 30 AUGUST

MAIN LECTURES

-English-Italian simultaneous translation-

9:30 am – 1:00 pm – Fraschini Theatre, C.so Strada Nuova 136

ATTACHMENT AND NEUROBIOLOGY

Chair/Discussant: **Marinus H. van IJzendoorn**, Leiden University, NL

Massimo Ammaniti - University of Rome “La Sapienza”, Italy; “Neurobiology and attachment: the role of the mirror neuron system”

Marian J. Bakermans-Kranenburg - Centre for Child and Family Studies, Leiden University, NL;
“Sniffing around Oxytocin. Trials with oxytocin administration in healthy and clinical groups”

Pasco Fearon - Faculty of Brain Science, University College of London, London, UK;
“The behavioral genetics of attachment in adolescence”

Ruth Feldman - Department of Psychology, Bar-Ilan University, Ramat – Gan, Israel;
“Bio-behavioral synchrony and the cross-generation transmission of social adaptation and psychopathology?”

FACTS, MYTHS AND DILEMMAS IN CUSTODY DISPUTES**

2:30 p.m.

Room: AULA SCARPA

Chair: Abraham (Avi) Sagi-Schwarz, University of Haifa, Israel

sagi@psy.haifa.ac.il

Discussant: Lavinia Barone, University of Pavia, Italy.

This is a round table without specific presentations. Instead each panelist is expected to address some of the basic questions posed by the symposium chair. The discussant will provide a final integration. A short description of the issues follows:

Recently Jennifer McIntosh, an Australian psychologist, advanced a debate about how to interpret attachment research with regard to child custody dilemmas. Issues of parenting arrangements for young children in cases of divorce are central to this discussion: Is there one primary attachment figure with which young children should spend most of their residential time? Or is there no inherent hierarchy in the intensity and quality of relationships of mothers and fathers, so that a more flexible-multilevel approach in overnight arrangements should be considered? In some jurisdictions the view of an attachment hierarchy, which recommends limiting overnight arrangements with a second parent is gaining momentum. Alternatively, there is considerable evidence that children benefit greatly when they have access to two caregivers, even in cases of acrimony. As yet, the debate concerning the “primary attachment” model versus the “dual attachment” approach remains divisive. Much of the current controversy in the family law literature rests on speculations and diverse interpretations of attachment theory, rather than on cumulative evidence-based research. The community of the Society for Emotion and Attachment Studies (SEAS) is increasingly interested in translating empirically-based knowledge to such burning issues. This roundtable symposium – comprised of a mixed international panel of presenters with diverse practice- and research-based backgrounds – will raise issues and ideas as well as research needs in order to facilitate responsible practice and policy directions that will minimize developmental risks and maintain appropriate parent-child relationships.

PRACTICAL INFORMATION

The 6th IAC Local Organizing Committee and the town of Pavia is pleased to welcome all IAC participants with special prices for Transportations, Bar, Pubs and Restaurants

TRANSPORTS

HOW TO GET TO PAVIA (FROM MILANO train stations and airports)

You can use this website to calculate the most convenient way (by train or by bus):

<http://www.muoversi.regione.lombardia.it/planner/home.do>

(languages: English, German, French)

How to get to Pavia by TRAINS

Trenitalia. From Milano Centrale Station, the trip takes about 40 minutes (low cost train, “regionale” ticket: 8 € roundtrip) or 25 minutes (“intercity” ticket, more expensive: 16 € roundtrip). [You can buy tickets at the train stations or through](#) the website www.trenitalia.com (this website has an English version: click on the English button/English flag on the upper right corner).

Connections with Pavia can be found also at the Milano Rogoredo Train Station (the closest one, about 20 minutes), at the Milano Lambrate Station, as well at Milano Garibaldi Station and at the Greco Pirelli Station.

Another train solution is **Trenord** (<http://www.trenord.it/it/orari/consulta-orario-ferroviario.aspx>; stations: <http://www.trenord.it/it/chi-siamo/le-linee/linee-s/s13.aspx>). Please look for TRENORD trains - S13 line - for more information: <http://www.my-link.it/mylink/>; you can find trains from Milano Rogoredo which are very quick (about 20 minutes for reaching Pavia) or trains from Milano Garibaldi station (about 40 minutes). Tickets can be found at automatic machines in the stations or at newspaper shops, asking for a ticket of 40 km. Tickets cost about 4 €.

How to get to Pavia by BUS

ARFEA

Information here: <http://www.arfea.it/>

Direct connection Milan Pavia, timetable: <http://www.arfea.it/index.php/linee-veloci/pavia-milano>

In Milano you can catch the bus at the MILANO-Famagosta subway station (MM2 Area Interscambio).

Tickets cost around 4-5 €.

Here you can locate the nearest authorized ticket retailers:
<http://www.arfea.it/index.php/ticket-point/mappa-delle-biglietterie>

How to get to Pavia from the MILAN AIRPORTS and back

By train or bus

Milano Linate Airport (58 Km distance from Pavia) website: <http://www.milanolate.eu/it>
Daily connections by bus (Migliavacca company: <http://www.migliavaccabus.it/>) between Milano Linate and Railway Station of Pavia.

In Linate: Arrival Terminal Exit number 6.

In Pavia: in front of the railway station, Migliavacca stop.

More information here: <http://orariautobus.org/shuttle/autobus-dallaeroporto-linate-a-pavia/>

Milano Malpensa Airport (85 Km distance from Pavia)

Malpensa Express is a train connecting the Airport to Milan Train Central Station (Milano Stazione Centrale) in about 30 minutes. www.malpensaexpress.it/en/ (about 10€)

Malpensa Shuttle (<http://www.malpensashuttle.it/>)

connecting Terminal 1 and Terminal 2 to Milano Train Central Station (Milano Stazione Centrale) in about an hour trip or Milano Bovisio and from there you can take a train to Pavia (see Train section).

Orio al Serio - Bergamo Airport

There is a bus service to the Milano Central Station:

<http://www.orioaeroporto.it/Editorial/newsCategoryViewProcess.jsp?editorialID=2175>.

(about 5€)

Once at the Milano Centrale train station look for trains to get to Pavia (see Train section).

BY CAR RENTING

Cars can be rented at the airports (Malpensa:

<http://www.milanomalpensa1.eu/it/accessibilita-e-parcheggi/modalita-trasporto/noleggio-auto>; Linate: <http://www.milanolate.eu/it/accessibilita-e-parcheggi/modalita-trasporto/noleggio-auto>).

Information on the route: www.viamichelin.com

Please be aware that the route Milano-Pavia is usually traffic congested. Thus, this solution is not suggested.
